CORRELATION WITHIN COHORTS 0.00

CORRELATION WITHIN AGES AND YEARS 0.39 0.08

## Retrospective analyses

Catchable biomass

Average F 4-9 years

**Saithe**

Catch-at-age 4-11 years

Recruitment index (at 4 years) obtained from trawl survey, 3-5 years

CPUE from trawl fishing in ages 6-8 years obtained by Glim indices. Linear trend in catchability estimated.

## Retrospective analyses

**Total biomass 4-11 years, 1000 tonnes.**

Disjoint points are estimates obtained with parameters from the whole data set, based only on observations up to respective point

**Average F 4-9 years. Disjoint points as in stocks.**
